Objective

Highly motivated and experienced Software Developer with over 5 years of experience in designing, developing, and maintaining software applications. Proficient in Python, JavaScript, and web development technologies. Seeking a challenging role to apply my skills in software development, and contribute to the success of innovative software solutions.

Skills

Programming Languages: Python, JavaScript

Web Development: HTML, CSS, React.js, Node.js

Software Development: Agile methodologies, REST APIs, Microservices

Design: UI/UX design, wireframing, prototyping, and design systems

Version Control: Git, GitHub, GitLab

Databases: MySQL, MongoDB

Tools: Docker, Kubernetes, Jenkins, JIRA

Cloud Platforms: AWS, Azure

Other Skills: Problem-solving, teamwork, communication

Experience

Software Developer

ABC Technologies, New York, NY

March 2020 - Present

- Developed and maintained web applications using JavaScript (React.js) and Python (Flask).
- Contributed to the design and development of a high-performance software application for client XYZ, improving processing speed by 30%.
- Collaborated with a cross-functional team of designers, developers, and project managers to deliver software solutions on time and within budget.
- Applied Agile methodologies to manage software development lifecycle and prioritize tasks based on business requirements.
- Wrote unit tests and debugged code to ensure high-quality software.
- Developed REST APIs to integrate with third-party services.

Junior Software Developer

XYZ Innovations, San Francisco, CA

June 2017 - February 2020

- Worked on developing front-end and back-end features for client-facing applications using JavaScript and Python.
- Assisted senior developers in designing scalable web applications.
- Contributed to the development of internal tools that reduced manual tasks and increased productivity by 40%.
- Participated in the design and development of a SaaS platform used by more than 1,000 customers.
- Assisted in client meetings to understand software requirements and help design software solutions.
- Led a small team in building a Python-based automation tool that streamlined business processes.

Education

Bachelor of Science in Computer Science

University of California, Berkeley, CA

Graduated: May 2017

Certifications

AWS Certified Developer - Associate (2021)

JavaScript Algorithms and Data Structures (freeCodeCamp)

Projects

Project Management Application

- Developed a task and project management application using React.js for the front-end and Python (Flask) for the back-end.
- Integrated authentication and real-time updates with WebSockets for user collaboration.
- Managed application deployment on AWS.

E-commerce Platform

- Designed and developed a full-stack e-commerce platform using Node.js, React.js, and MongoDB.
- Implemented features like user authentication, payment integration, and product management.
- Deployed the platform on AWS and integrated with a third-party API for shipping calculations.

Additional Information

Strong problem-solving skills and attention to detail.

Ability to work independently or in a team environment.

Passionate about software development and continuous learning.
